IVÁN DE CASTILLA GUTIÁN

Game Developer · Unity & C#

BSc in Video Game Design & Development (URJC, Madrid)

PROFILE

Junior game developer trained in the Video Game Design & Development degree at Universidad Rey Juan Carlos (2022–2026). I build in **Unity with C#** and am expanding into **C++ / Unreal Engine**. **Two-time game jam winner**, with games showcased at **Gamescom (Cologne)** and **Indie Dev Day (Barcelona)**, and I have shipped virtual-lab serious games for the Technical University of Madrid. I love where tech meets narrative: gameplay systems, scriptwriting and stories that connect with players. Bilingual English / Spanish.

EXPERIENCE

Unity Developer · Virtual Labs

Sep 2025 – Dec 2025

Technical University of Madrid (UPM) – GATE

- Built virtual laboratories in **Unity / C#** used as **serious games** and gamified assessments across several degree programmes.
- Integrated the team's 3D models and programmed each lab's logic from professors' requirements.
- Solved the **Unity** ↔ **Matlab server communication** so gameplay data was sent to the cloud and delivered straight to professors, removing most of the manual workload and unblocking project delivery.

Attractions Operator

Jun 2025 – Aug 2025

Walt Disney World · Florida, USA

- Served thousands of international guests daily across three attractions (Prince Charming Regal Carrousel, Mickey's PhilharMagic, Princess Fairytale Hall).
- Coordinated with the team over radio using operational codes to handle issues without breaking the guest experience.

Student Mentor

Universidad Rey Juan Carlos

Guided new and junior students through their academic and social integration.

SELECTED PROJECTS

NOVA · Strategy · Hijacked Games team · 4th-year capstone

Programmed 50% of the game: inventory, economy, upgrade tree, combat, character behaviour with state machines and **Utility AI**. Combines four degree courses.

Quantum Memories · Co-op puzzle · **1st place, URJC Game Jam** · showcased at

Gamescom, Cologne

Development and scriptwriting for a quantum-mechanics co-op puzzle game.

Unchained · Puzzle · **1st place game jam** · showcased at **Indie Dev Day**, Barcelona

Scriptwriting and programming support.

When I Think, It Hurts · Narrative · solo project · **5th of 32 teams** (Game Scholars Game Jam, 5th ed.)

Solo design, writing and programming; shaders and Observer pattern.

Metus Et Insania · Narrative 2D platformer · solo project · graded **10/10**

My first complete game, written and developed entirely by me.
